Contents Volume 53

Contents

Guest Editorial: Empirical studies of software development and evolution
R. Harrison 1

Towards a framework for empirical assessment of changeability decay
E. Arisholm and D.I.K. Sjøberg 3

Use of friends in C++ software: an empirical investigation
S. Counsell and P. Newson 15

An investigation of machine learning based prediction systems
C. Mair, G. Kadoda, M. Lefley, K. Phalp, C. Schofield, M. Shepperd and S. Webster 23

Empirical analysis in software process simulation modeling
D.M. Raffo and M.I. Kellner 31

Using evolution to evaluate reverse engineering technologies: mapping the process of software change
E. Burd and M. Munro 43

Priorities for the education and training of software engineers
T.C. Lethbridge 53

Optimal binary vote assignment for replicated data
H.-K. Chang and S.-M. Yuan 73

Branch grafting method for R-tree implementation
T. Schreck and Z. Chen 83

Editor's corner: The End of the "Outsourcing Era"
R.L. Glass 95

Coping with requirements-uncertainty': the theories-of-action of experienced IS/software project managers
T. Moynihan 99

A method and tool for assessing object-oriented projects and metrics management
F. Fioravanti and P. Nesi 111

Estimating the extent of standards use: the case of ISO/IEC 15504
K.E. Emam and I. Garro 137

An investigation of risk perception and risk propensity on the decision to continue a software development project
M. Keil, L. Wallace, D. Turk, G. Dixon-Randall and U. Nulden 145

A new approach to fault-tolerant scheduling using task duplication in multiprocessor systems
K. Hashimoto, T. Tsuchiya and T. Kikuno 159

TOFF-2: A high-performance fault-tolerant file service
C.C. Chin and S.-R. Tsai 173

An experimental comparison of reading techniques for defect detection in UML design documents
O. Laitenberger, C. Atkinson, M. Schlich and K. El Emam 183

Editor's corner: The missing piece of software development
A.M. Davis and A.S. Zweig 205

Extending the product family approach to support safe reuse
R.R. Lutz 207

Types of collaborative work in software engineering
P.N. Robillard and M.P. Robillard 219

A hybrid approach to analyze empirical software engineering data and its application to predict module fault-proneness in maintenance
S. Morasca and G. Ruhe 225

Function point counting: one program's experience
G. Orr and T.E. Reeves 239

System Software support for distributed real-time systems
Y. Atif 245

Special Section on Software Risk Management

Risky business: what we have yet to learn about risk management
S.L. Pfleeger 265

Testing software to detect and reduce risk
P.G. Frankl and E.J. Weyuker 275

Risk-based testing: Risk analysis fundamentals and metrics for software testing including a financial application case study
S. Amland 287
